Amadeus Flash

Dear Business Partner,

It is nearly a year ago since we successfully completed the Password Protection Program enforcing passwords on all signs. With this program, and other security measures, Amadeus has provided the tools for its subscribers / users to protect their systems and their business.

With the growth of online fraudulent activities and various other security threats, faced by all sectors, these security measures are increasingly important.

Amadeus India has already taken the positive step to pass on to the subscribers the rights to administer the security settings of their own offices. In an effort to simplify the task of maintaining the Local Security, to increase self-sufficiency and to eliminate the need for users to contact Amadeus helpdesk for this, we strongly recommend that LSA rights be assigned to Senior responsible staff at Agencies with one back up (if need be).

To ensure optimum use of the security functions and to protect data, we ask you to continue to:

- ***Remain vigilant over all valid user sign in.***
- ***Follow the security procedures in place in your organization at all times.***
- ***Maintain the importance of security measures and protecting their private information and system credentials such as User IDs or Passwords.***

To get LSA enabled for your office, please contact your Amadeus Helpdesk
